

Dura_{PRO}

Compared to ON/OFF heat pumps, inverter driven pumps automatically optimise the refrigerant flow rate by varying the speed of both the fan and the compressor. Inverter technology makes it possible to reach extremely high COPs regardless of the outside temperature. This does not only save energy but the pool is also swim-ready in no time. The desired water temperature can be adjusted in steps of 0,1°C.

On top of all these benefits you can enjoy the silence thanks to a unique internal ventilation structure that keeps the noise below 50dB even reaching 40dB in silent night mode. The unit is equipped with a 5" full colour touch screen display. Not only temperature and energy consumption can be easily monitored, but also all pressure related information coming from the built-in digital pressure sensor. Dura^{PRO} is offered in 5 different models ranging from 12, 17, 21, 25 and 28T kW.

Wifi control unit is available

Features & benefits

- Easy to use digital control panel
- Soft start
- Low noise, multi-speed fan
- Automatic hot gas defrosting
- Titanium heat exchanger
- Operates in air temperatures as low as -15°C
- Capable of heating and cooling, all year round

COP up to 13,5

-15

< 46 dB(A)
